## Lunch Break

Our organization furnishes the best food we possibly can to your school. That commitment extends to serving growth hormone and antibiotic-free milk. Recombinant Bovine Growth Hormone (rBGH/BST) is a synthetic growth hormone used to increase milk production in cows. Providing rBGH and antibiotic-free milk is in line with our overall philosophy of incorporating locally-grown foods and eco-friendly products into the school lunch program.

**Meals Served with rBGH (Growth Hormone) & Antibiotic-Free Milk**
